Frontend Developer

- As a front-end developer with 1+ years of experience, I have a strong understanding of HTML, CSS, and JavaScript.
- I have experience working with popular front-end frameworks such as Tailwind CSS, and have developed responsive and user-friendly websites and applications.
- I am passionate about creating intuitive user interfaces and delivering seamless user experiences. I am a quick learner, a team player, and am always looking for new challenges and opportunities to grow my skills in all technologies that should I have like React JS and Redux.

CORE PROFICIENCIES

- | | | |
|---------------------|-------------------|--------------------------|
| – HTML | – JavaScript | – React JS (in progress) |
| – CSS | – JSON & REST API | – Git & GitHub |
| – Responsive Design | – Tailwind CSS | |

PROJECTS

Store Management App

This application manages the store's products with all their details.

Features:

- It allows adding a product to the store with all its details such as price, discount, and taxes if any, with the possibility of modifying them by the manager whenever he wants.
- The ability to search for products or filter them by name or manufacturer to facilitate the display and management of products by the manager.

Technologies: HTML, CSS, JavaScript, Local Storage.

Live Demo: [CRUDS \(hasanfashtook.github.io\)](#).

FIFA WORLD CUP

A website that transfers FIFA league news.

Features:

- It displays the results of the groups, each group consisting of four teams, without showing the details of each team such as the number of points for wins and losses.
- It displays the results of current matches as well as the dates of upcoming matches.

Technologies: HTML, CSS, JavaScript, Tailwind CSS, API, Axios.
